

Opportunity to Learn Project: Planning & Implementation Grant Support

The **Opportunity to Learn Project** gives Indiana school districts an opportunity to identify and address non-academic barriers that interfere with student learning and success.

Inspire Success can help districts make the most of the planning period—moving from identified needs and stakeholder perspectives to a focused, locally appropriate strategy and a strong competitive implementation grant proposal.

Our Approach

We guide district teams through a facilitated planning process:

Choose the Level of Support That Fits Your District

Support Option	Inspire Success Role
Strategic Advisor	District-led planning with targeted consultation, research, strategic guidance, and proposal review
Planning Partner	Shared planning, stakeholder engagement, strategy development, and proposal development
Lead Planning Partner	Inspire Success leads the facilitated planning process, stakeholder engagement, strategy development, and proposal development

Services can be tailored to district priorities, existing initiatives, staffing capacity, and the size and scope of the planning grant.

Need Help with the September 15 Planning Grant Application?

Districts selecting Inspire Success as their planning partner can receive development of the initial Opportunity to Learn planning grant application at no additional cost, with the selected planning support included in the proposed grant budget.

Districts seeking application assistance only may also choose either application review and feedback or full application development support.

Interested in Exploring a Partnership?

We would welcome a brief conversation about your district's needs, existing work, and whether Inspire Success could support your Opportunity to Learn Project planning process.
